

The New Era Of Air™

AQaaS™ Air Quality as a Service

C2 offers its end-to-end proprietary service utilizing HD/BPI™ to create ultra-pure indoor air environments. We utilize our CMC Platform™ to deliver HiPure™ air quality wherein people thrive and flourish.

C2 brings a new era of air, where the indoor air we breathe isn't just pure but verifiably pure. And we're determined to make it happen by delivering the one and only service that can create, measure, and certify ultra-pure indoor air quality environments equivalent to pristine mountain air.

The post-pandemic world has left many feeling exposed, isolated, and afraid of the unknown health risks within their environment. Especially within assisted living facilities, for whom respiratory illness is an even larger concern, protection and purification of the airspace are vital. And justifiably so - people are 1000 times more at risk of viral transmission via the air they breathe than from surface contact. By protecting and enriching the airspace, assisted living facilities enable their residents and employees to thrive confidently within an environment that promotes longevity, mental and physical health, and social community.

C2 believes everyone deserves to 'Breathe in Life'. We change the breathing experience to protect human health from the invisible threats within indoor air spaces and allow people to thrive and flourish as they experience the incredible benefits of breathing ultra-purified air.

Create

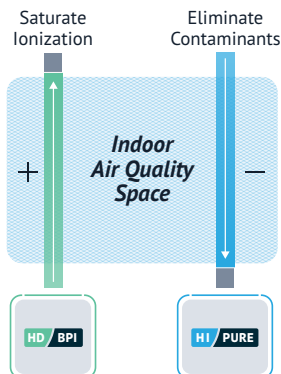

We rapidly assess your space, design for optimal ion density, and implement the C2 CMC platform to create and maintain incredible fresh forest air inside your building. C2 AQaaS™ enables assisted living facilities to deliver an elevated occupant experience, helping those living and working within their buildings to flourish together as a result of the enriched airspace.

Measure

We continuously measure, analyze, compare, and display your indoor air quality results against established international indoor air quality standards. Historical, trending, and real-time data intelligence allows your facility to see your progress and to share this information with residents, guests, and employees if desired.

Certify

We reduce the complexity of knowing how your indoor air quality metrics and variables match up against international standards specific to your facility type and, importantly, celebrate your ultra-high pure air environment through the C2 HiPure™ certification indicating exceptional levels of air purity.

Forest-quality air is ion-rich. C2 enriches anemic indoor spaces with a continuous supply of oxygen ions that actively bind up and inactivate harmful contaminants in the air, such as viruses, bacteria, fine particulate matter, mold, fungi, spores, allergens, dander, and smoke, rendering them harmless and removing them from the airspace.

Give the gift of assurance and longevity

With C2, assisted living facilities are empowered to break down walls of fear and uncertainty that cause distance, division, and depression among occupants. Address the cause of these concerns, the airspace, and bring visibility to the air quality being created in real-time within your building so that residents and employees can experience a boost of confidence that they will enjoy healthier, happier, and longer lives together within their daily environments.

Elevate your facility as a “Quality of Life” provider

Air is your resident’s most vital physiological need. But many other assisted living facilities take for granted that the air they provide their residents is life-giving when in reality they have no way of knowing. Elevate your facility in the public eye by investing in a resource that is proven to improve people’s quality of life by improving residents’ sleep, moods, cognitive function, physical strength, productivity, mental health, and longevity. Attract residents who place a high priority on the quality of their years over quantity.

Eliminate stale air and odors

Stale, unpleasant air destroys the atmosphere within any building. But on the other hand, forest-fresh air invigorates the occupants of HiPure environments, creating a one-of-a-kind experience for your residents, guests, and employees. People will breathe deep and breathe easy while enjoying the enriched air that actively eliminates any stale air and odors within your space. With C2, you can ensure your facility smells fresh, crisp, and rejuvenating for everyone in it.

Differentiate your facility

- ✔ Develop a marketing edge with a demonstrable breathing experience superior to conventional air environments
- ✔ Deliver enriched living conditions to prospective residents
- ✔ Eliminate common assisted-living odors stemming from incontinence and other contributing factors
- ✔ Attract more discerning clientele sensitive to ambient conditions

Improve occupant health

- ✔ Enhance cognitive function within C2 HiPure™ environments
- ✔ Remove airborne particulate that causes asthma and allergic reactions resulting in better sleep and physical strength
- ✔ Actively eliminate airborne viruses and bacteria within rooms and facilities
- ✔ Eliminate Sick Building Syndrome

Champion vitality and community

- ✔ Make a powerful statement by investing in resident and employee health
- ✔ Attract clientele that desires superior care and strong community enablement
- ✔ Establish “Quality of Life” as a company value
- ✔ Improve ESG posture related to occupational health and safety, and Indoor Environmental Quality

Breathe Pure Today! (801) 613-1131

C2 is the only company to offer Air Quality as a Service (AQaaS) through our patented CMC Platform, actively maintaining healthy human environments by delivering the world’s first complete holistic solution that creates, measures, and certifies healthy indoor air quality. C2 is the new era of air – in both residential and commercial environments.
