

AQaaS™ Air Quality as a Service

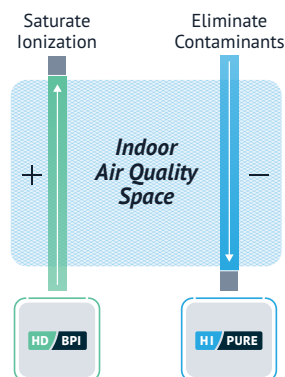

C2 offers its end-to-end proprietary service utilizing HD-BPI™ to create ultra-pure indoor air environments. We utilize our CMC Platform™ to deliver HiPure™ air quality wherein people thrive and flourish.

C2 brings the new era of air, where the indoor air we breathe isn't just pure but verifiably pure. And we're determined to make it happen by delivering the one and only service that can create, measure, and certify ultra-pure indoor air quality environments equivalent to pristine mountain air.

The post-pandemic world requires businesses to adapt to new employee expectations. The validity of traditional office and in-person working environments are being questioned for their apparent lack of safety and the inconvenience to employees. Employees have hesitated to gather together in fear of getting sick from airborne contaminants. And justifiably so – people are 1000 times more at risk of viral transmission via the air they breathe than from surface contact. Protecting and enriching the airspace is vital in order to create a working environment that fosters the community, camaraderie, and innovation one can only experience in proximity to other people.

C2 believes everyone deserves to breathe in life. We change the breathing experience to protect human health from the invisible threats within indoor air spaces and allow people to thrive and flourish as they experience the incredible benefits of breathing ultra-purified air.

Forest-quality air is ion-rich. C2 enriches anemic indoor spaces with a continuous supply of oxygen ions that actively bind up and inactivate harmful contaminants in the air, such as viruses, bacteria, fine particulate matter, mold, fungi, spores, allergens, dander, and smoke, rendering them harmless and removing them from the airspace.

Create

We rapidly assess your space, design for optimal ion density, and implement the C2 CMC platform to create and maintain incredible forest fresh air inside your building. C2 AQaaS™ enables buildings to deliver an elevated occupant experience, helping employees enjoy their working environments in community.

Measure

We continuously measure, analyze, compare, and display your indoor air quality results against established international indoor air quality standards. Historical, trending, and real-time data intelligence allows your business to see your progress and to share this information with employees and other building occupants if desired.

Certify

We reduce the complexity of knowing how your indoor air quality metrics and variables match up against international standards specific to your facility type and, importantly, celebrate your ultra-high pure air environment through the C2 HiPure™ certification indicating exceptional levels of air purity.

Create assurance and trust.

With C2, businesses are empowered to break down walls of fear and uncertainty that cause distance and division among employees. Address the cause of these concerns, the airspace, and bring visibility to the air quality being created in real-time at the office so that employees can experience a boost of confidence that they are able to thrive in a daily environment of side-by-side collaboration and community.

Boost revenue and eliminate expenses.

High levels of carbon dioxide are proven to inhibit cognitive function by as much as 21%, and unhealthy air quality levels inhibit productivity by making occupants sluggish, distracted, or even seriously ill. With C2, your employees operate within HiPure environments that increase cognitive function, physical performance, and productivity, which in turn creates a healthier, more efficient business. Boost revenue and eliminate expenses in your organization by fueling your team's daily performance with AQaaS.

Bring employees back to the office.

With C2, the office experience is no longer bland or even dreaded. Forest-fresh air invigorates the occupants of HiPure environments, creating a one-of-a-kind experience for the employees. When they return to the office and encounter enriched air, a vibrant community, and an environment that stimulates top-notch performance, many employees will wonder how they ever lasted so long shut up at home. The office will become a "can't miss" experience infused with safety, health, community, and energy.

Increase Executive Performance

- ✓ Enhance cognitive function within C2 HiPure™ environments
- ✓ Boost the critical and strategic thinking of company leaders
- ✓ Contribute to better moods and mental health

Eliminate Sick Building Syndrome

- ✓ Reduce employee absenteeism by eliminating unhealthy air
- ✓ Get rid of that "afternoon haze" that inhibits productivity
- ✓ Remove airborne particulate that causes asthma and allergic reactions

Elevate your brand position

- ✓ Make a powerful public statement by investing in employee health
- ✓ Attract talented and health-minded people to work in your business
- ✓ Establish "Quality of Life" as a priority for members of your organization

Breathe Pure Today! (801) 613-1131

C2 is the only company to offer Air Quality as a Service (AQaaS) through our patented CMC Platform, actively maintaining healthy human environments by delivering the world's first complete holistic solution that creates, measures, and certifies healthy indoor air quality.

C2 is the new era of air – in both residential and commercial environments.
